

SPRINT-3

1. Create an Chatbot for Smart Fashion Recommender Using Watson Assistant.

The screenshot displays the 'Actions' section of the Watson Assistant interface. On the left, a sidebar contains navigation options: 'Actions' (selected), 'Variables', and 'Saved responses'. Under 'Actions', there are sub-options: 'Created by you', 'Set by assistant', and 'Set by integration'. The main area features a blue informational banner at the top explaining that actions are core to the build process. Below this is a table listing actions created by the user. The table has columns for 'Name', 'Last edited', 'Examples Count', and 'Status'. Two actions are listed: 'action' and 'Thank you!'. Both have a status of 'Success' (indicated by a green checkmark). At the bottom right, there is a 'Preview' button.

Actions sit at the core of the new Watson Assistant build process. Think of them as problems or tasks that your customers want your assistant to resolve for them. They include the complete interaction between a customer and your assistant for a specific question or request.

Customer starts with:

Enter phrases that a customer types or says to start the conversation about a specific topic. These phrases determine the task, problem, or question your customer has.

The more phrases you enter, the better your assistant can recognize what the customer wants.

Enter phrases your customer might use to start this action Total: 14
